

## Unit 9 Discussion Example - Second Response to a Classmate's Post

**Second Response:** Review a different classmates' post. Further the math conversation by identifying any additional variables that may have been overlooked or added into the project. How would this change the overall project timeline?

\*\*\*\*\*

I reviewed the course revision process. It looks like my project would finish in about 18-19 weeks (4 and a half months). Some considerations that might have been overlooked might include publisher pricing negotiations, employee vacations, holidays or sick leave, technical glitches or errors, software updates... to name just few considerations.
