

**HN220 Unit 7 Case Study Script:
The Case of Sally & Mike**

Hello, again. This week, I'd like you to evaluate Sally and Mike's case. For this case, you should apply the ABC Model of Crisis Intervention using critical thinking. Due to the nature of this case, you should also apply Kubler-Ross's Five Stages of Death and Dying. Remember to use intervention strategies in your evaluation.

Sally and Mike lost their 6-year-old son to cancer a month ago. Mike is here to support Sally because she feels that her life is over and that she has no reason to live. Sally admits that she feels guilty for still living and going on with life. Sally cannot accept the fact that a child dies before a parent. It is not the normal way of life. Mike is going crazy because all he hears from Sally is her telling God to take her and bring her son back. Mike, on the other hand, feels that this is just life. He believes that his son was here for only a short time and that his work is done. Mike admits that he has no idea what is wrong with Sally or how to help her because he is doing just fine.
