

## GF530: Financial Statement Analysis | Unit 3 Assignment 2

### Assignment: Final Project – Calculate the Ratios

- Using the list from the back of your textbook, select 2–3 ratios from each of the following 6 diagnostic financial performance categories, decide which ratios (2–3 for each diagnostic category listed) you wish to use.
  - Short-term liquidity
  - Capital structure and solvency
  - Return on invested capital
  - Asset turnover (utilization)
  - Operating performance and profitability
  - Financial market measures
- Using the ratios you select, gather the information you need to calculate the ratios from your selected company's 10-K or annual report.
- Calculate the ratios for your company, the industry and a competitor. [Review an example of the ratio chart](#). The ratio chart will be used as a basis for the project for your conclusion of whether in your opinion, with the ratios as your basis, the company is doing well or not.

Once completed, one Word® file with your calculated ratios, should be submitted to the Unit 3 Assignment 2 Dropbox. Assignments are due Tuesday 11:59 p.m. ET of their assigned unit.
