

Unit 1 Assignment Scenario:

Carl Zenks is a very successful plumber who bought a shell of a home that was only mostly finished when he purchased it in Phoenix, Arizona. He bought the house without any light fixtures, appliances, plumbing fixtures or any electronics or electrical features. Carl added the following to his property: He installed an alarm system, a surround sound system, an embedded flat screen television in the bedrooms, telephones in all the bathrooms, a stair lift for his mother to get up to the second floor, and an above ground pool. He also added new plumbing fixtures, a workshop with all his plumbing tools, fans in all the main rooms, some stand-alone lamps, a few ceiling fixtures, all the appliances, a boat dock out back, additional lighting around the driveway, and a household surge protector out in the garage to ensure the appliances are not destroyed by an over-surge of electricity. After five years, he is selling the home.
