

Unit 1 Discussion Example - First Response to a Classmate's Post

First Response to a Classmate's Post: Review a classmate's post and download the dataset they commented on. Identify another numerical variable not discussed. Run the descriptive statistics summary table on that variable and share it.

I choose to comment on UsedCars.xlsx. Another numerical variable not discussed is Fuel (MPG). It is a numerical variable that is continuous (Note: Usually it is rounded to whole number precision).
