

Shadow Health Charting Notes

The following table compares sections of a chart as described in your textbook to those in Shadow Health. Use this to make sure you are including the correct information in appropriate areas.

Shadow Health Charting Text Boxes	Chart these components from your Jarvis Text, chapter 4, in the associated Shadow Health charting text boxes.
Chief Complaint	Biographic Data and Reason for Seeking Care should be charted in this section of your Shadow Health Complete Health History Assignment
History of Present Illness	All 8 critical characteristic from chapter 4 should be charted here
Pain Assessment	Pain assessment should be charted here
Allergies	All drug, environmental, and food allergies should be charted here. Remember to assess latex allergy. See past health from chapter 4
Immunizations	Immunizations should be charted in this section of your Shadow Health Complete Health History Assignment. See past health from chapter 4
Medication	Patients current home medications should be charted here. See past health from chapter 4
Medical History	See past health section in chapter 4. The following subsections should be charted here: childhood illnesses, accidents or injuries, serious or chronic illnesses, and last exam dates
Surgical History	See past health from chapter 4
Previous Hospitalization	See past health from chapter 4
Gynecological History	See past health from chapter 4. Include history related to: last pap, STI's, birth control use, sexually activity, protection use during intercourse, menstrual cycle pattern and severity, and pregnancy
Family History	See family history from chapter 4. Include parents, maternal and paternal grandparents, and siblings. List each individual separately including age at time of death if applicable
Social History	Include all functional assessment categories from chapter 4 here
Review of Systems	See Review of Systems from chapter 4. Include all systems. Chart the presence or absence of symptoms for each system
