

Progress Notes

Review this presentation, [Progress Notes: What you need to know](#).

You should follow your facility's guidelines in the practice setting.

Your facility's requirements and standards will take priority over these general guidelines. Please research and review your facility's documentation standards for additional guidance.

A progress note in Shadow Health should include:

- your description of what happened,
- your assessment,
- the action you took, and
- the patient's response to your actions.

A progress note in Shadow Health should include a description of what occurred, the nurse's assessment, the actions that were taken, and the patient's response.

Follow-up should be included in the progress note where appropriate in Shadow Health.

A follow-up to any nursing actions and the patient's response should be documented in Shadow Health as dictated by each assessment.
